SUMMARY

MERN Stack Developer with 2+ years of experience in frontend development using React.js, Next.js, JavaScript, HTML, and CSS, along with hands-on backend development experience using Node.js, Express.js, and MongoDB. Experienced in building responsive, scalable, and high-performance web applications with a strong focus on user experience and clean UI design. Worked on 10+ real-world projects, developing reusable components, integrating REST APIs, implementing efficient state management, and optimizing application performance. Possess practical knowledge of backend development, including designing RESTful APIs, authentication and authorization, database management with MongoDB, and server-side application development using Express.js and Node.js.

SKILLS

Languages: JavaScript , TypeScript, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, Context API, Zustand, Socket.IO
Backend: Node.js, Express.js
Database: MongoDB, Mongoose
Styling: Tailwind CSS, Bootstrap, Material UI
API & Authentication: REST APIs, Axios, JWT Authentication, Firebase Authentication, Twilio (International OTP Authentication)
Tools & Platforms: Git, GitHub, Jira, Postman, Firebase, MongoDB Compass, Vercel, Netlify
Performance: Lazy Loading, Code Splitting, Responsive Web Design, Cross-Browser Compatibility, Performance Optimization, Reusable Component Architecture

EXPERIENCE

Front End Developer <i>Techgropse Pvt. Ltd.</i>	May 2024 - Present Noida, Uttar Pradesh
---	--

- Developed and maintained scalable frontend applications using **React.js, Next.js, JavaScript (ES6+), HTML5, and CSS3**.
- Implemented **Redux Toolkit** for efficient global state management in large-scale applications.
- Improved application performance by implementing **Lazy Loading** and **Code Splitting**, reducing initial load time.
- Integrated **RESTful APIs** and collaborated closely with backend developers to ensure seamless data flow.
- Developed **multilingual (i18n)** applications with localization support, enabling a seamless user experience across multiple languages and regions.
- Integrated **Twilio** for international OTP authentication, enabling secure phone number verification for users across different countries.
- Participated in client meetings to gather requirements, provide project updates, and deliver tailored solutions.
- Collaborated with cross-functional teams using Jira to manage tasks, track progress, and achieve sprint goals.
- Built responsive, cross-browser compatible user interfaces while optimizing application performance.

- Built and optimized responsive web applications using React.js, JavaScript, HTML, and CSS.
- Implemented Redux for global state management to handle complex data flows across components.
- Collaborated with backend developers to integrate REST APIs and dynamically render data.
- Developed reusable React components, ensuring a clean and maintainable codebase.
- Worked in an Agile environment with daily stand-ups and used Git/GitHub for version control

PROJECTS

Home101 – Property Listing & Home Services Platform (Link)

- Engineered Home101, a full-scale real estate platform enabling property buying, selling, and renting with a seamless user experience.
- Architected a role-based system (Owner, Buyer, Service User), improving platform usability and user flow.
- Developed a home services marketplace (cleaning, AC servicing, plumbing, etc.), expanding platform functionality.
- Implemented multi-language support (6 languages), increasing accessibility for a global user base.
- Built dynamic currency handling (USD, VND) to support cross-region transactions.
- Integrated secure payment gateway with one-time and recurring billing, ensuring smooth financial operations.
- Designed OTP-based authentication system using Twilio (SMS, WhatsApp, Voice) for enhanced security.

Bianca Nera – E-com Platform (Link)

- Developed a responsive multi-language clothing e-commerce platform with English and Arabic localization, including RTL (Right-to-Left) support for Arabic users.
- Built core e-commerce features including product listings, product details, shopping cart, wishlist, user authentication, and secure checkout.
- Integrated RESTful APIs for product catalog, inventory management, user accounts, and order processing.
- Implemented Redux Toolkit for efficient state management of products, cart, wishlist, and user sessions.
- Integrated third-party payment gateway to enable secure online transactions and seamless checkout.
- Enhanced user experience with product search, filtering, sorting, responsive design, and cross-browser compatibility.
- Optimized application performance using Lazy Loading, Code Splitting, and reusable React components.

Movix – Movie Discovery Web Application (Link)

- Built a responsive movie and TV show discovery platform using React.js, Redux Toolkit, SCSS, and the TMDB API.
- Implemented dynamic search, trending, popular, top-rated, and upcoming movie listings with detailed information pages.
- Integrated REST APIs using Axios to fetch real-time movie, TV show, cast, trailers, and ratings data.
- Developed reusable and modular components with efficient state management using Redux Toolkit.
- Optimized application performance with lazy loading, code splitting, and responsive UI for a seamless user experience across devices.
- Deployed the application on Vercel.

Tech Stack: React.js, Redux Toolkit, JavaScript, Tailwind, Axios, TMDB API, Vercel

EDUCATION

B.tech

Kiet Group Of Institutions, Abdul Kalam Technical University

Apr 2023

Ghaziabad, Uttar Pradesh
